

# Abe's Boat Rentals

## Check List

1. I have been shown life jackets, one per person (All persons under ninety (90) pounds or children under the age of six (6) must wear a fitted jacket while the boat is in motion), whistle, throwable flotation device, fire extinguisher, flares, registration, anchor and anchor line.
2. I have been shown starting procedures, key, fast idle, and kill switch. The boat is equipped with neutral safety and will not start in gear.
3. I have been shown the trim switch. I understand to put the boat on plane it must be trimmed all the way down. I know not to trim the motor all the way out of the water so I will always be able to move the boat.
4. I have been shown the bilge and it is free of water. I understand that the bilge pump operates automatically and manually and I have been shown how to operate.
5. I understand in and around the marina and the marina channel is wakeless speed (idle speed) only.
6. I understand that I must keep inside marked channels at all times or that I will run aground. If I do run aground I will shut off engine, anchor the boat, and call the dock immediately. **I accept all responsibility for damages resulting from grounding.**
7. I have inspected the boat and it is acceptable for my purposes
